Professional Profile

I am a full stack developer with over four years of experience creating digital solutions that optimize processes and add value to teams. I am passionate about continuous learning, exploring new ideas, and finding creative ways to solve problems. In addition to my technical skills, I am known for my ability to work on a team and foster a positive work environment. My empathy allows me to connect easily with people and enhance collaboration in multidisciplinary settings.

Professional Experience

Full Stack Developer – Innesux | February 2024 – Present | Río Cuarto, Córdoba

Customer: Iluminar Laboratorio https://iluminarlaboratorio.com.ar/

- Collaborated on system scalability, transforming it from an internal tool into a commercial product for other laboratories.

Customer: Adrian Mercado adrianmercado.com.ar

- Implemented a multi-profile billing system, enabling users to make payments with different tax IDs and bank accounts.
- Developed an auction profit calculator and exportable financial reports in PDF and Excel, improving revenue visibility.
- Optimized platform performance by resolving bugs, enhancing the user experience.

Tools: Python, JavaScript, Django, FastAPI, React.js, PostgreSQL, MySQL, JIRA, Bitbucket, Docker, HTML, CSS.

Full Stack Developer – Picallex | January 2022 – January 2024 | Río Cuarto, Córdoba

- Developed custom views and a set of tools adapted for the sales, support, and billing teams, optimizing their workflows.
- Automated the calculation and generation of invoices using cron jobs, which reduced the team's manual workload and improved financial accuracy.
- Created a platform for the efficient management of Key Account Managers (KAMs), improving key client tracking and handling.
- Developed functionalities for PBX administration and technical incident resolution for the support team.
- Generated financial reports exportable in PDF and Excel to facilitate metric analysis.

Tools: Python, PHP, JavaScript, Django, Laravel, SQL, HTML, CSS, MySQL, PHPUnit, Docker, JIRA, GitHub.
